

OpenStreetMap

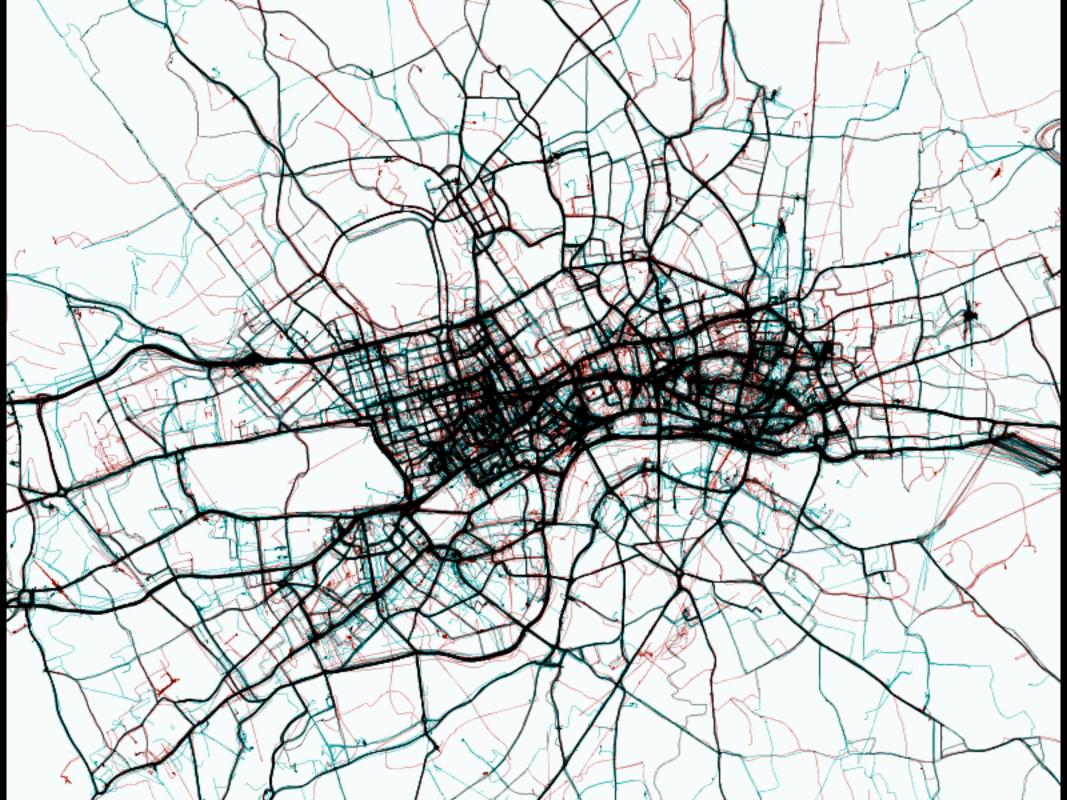

#22

Steve Coast www.zxv.ltd.uk

Why OSM?

- Data not Free/Open
- Data not current
- Wiki is obvious the next step

Some Quotes

Quote 1

"It's absolutely possible for a bunch of smart guys with the technology we have today to capture street networks, and potentially the major roads of the UK and minor roads"

Ed Parsons - CTO Ordnance Survey

Quote 2

"If you don't make [lower-resolution mapping data] publicly available, there will be people with their cars and GPS devices, driving around with their laptops .. They will be cataloguing every lane, and enjoying it, driving 4×4s behind your farm at the dead of night. There will, if necessary, be a grass-roots remapping."

Tim Berners-Lee

Quote 3

"You could have a community capability where you took the GPS data of people driving around and started to see, oh, there's a new road that we don't have, a new route .. And so that data eventually should just come from the community with the right software infrastructure."

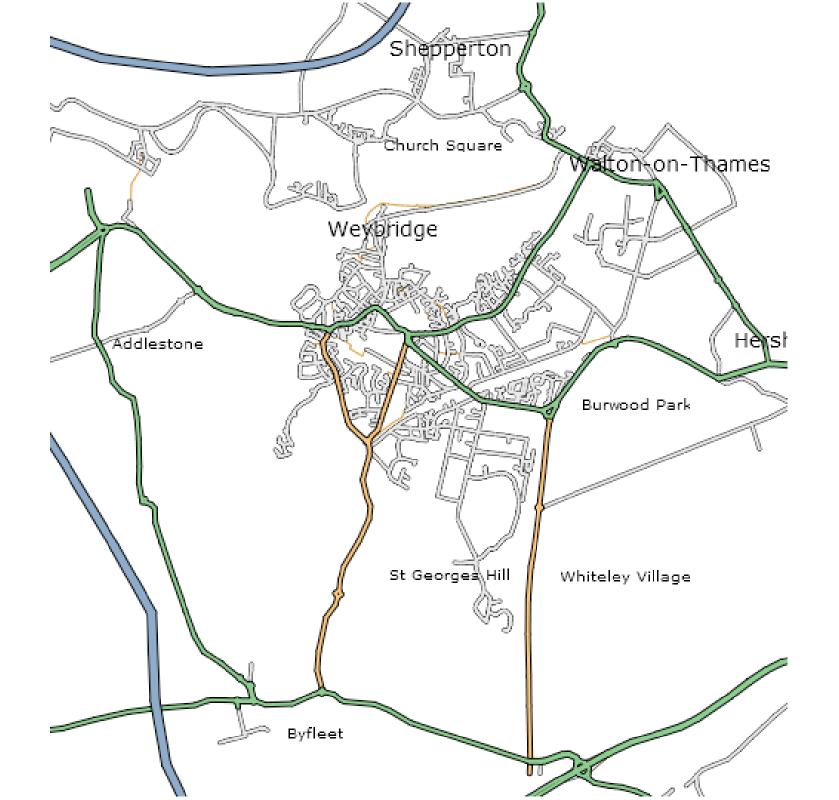

Bill Gates

A-Z

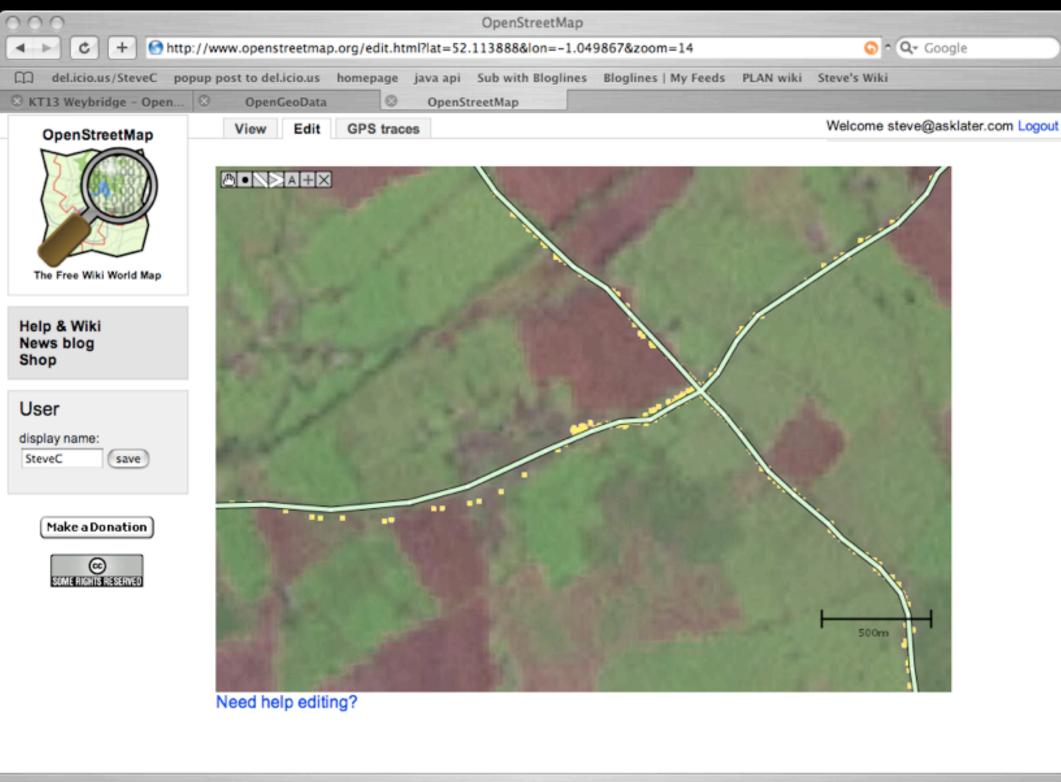

Norman Dennison, director of Geographers' A-Z Map Company, confirms that Lye Close is a lie, which will now be removed. "The idea is to put something on the map to protect copyright," he says. "We try to put it in an area or a part of a road which would not be misleading to the ordinary person in the street. They have been put in out-of-the-way places."
